CONTENTS OF VOLUME 22

Vol. 22, No. 1

Minireview

Satoshi Tokutake — 1 — On the assembly mechanism of neurofilaments

General Papers

Gernot Osthoff — 7 — Differing stabilities of snake venom cardiotoxins in acidic aqueous acetonitrile

G. Harder, J. C. Jamieson and B. M. R. N. J. Woloski — 11 — Stimulation of release of Galβ1-4GlcNAcα2-6 sialyltransferase from the FAZA hepatoma cell line by dexamethasone and phorbol ester

Louisa Gay and Marion Ehrich — 15 — A comparative study of drug metabolizing enzymes in adrenal glands and livers of rats and chickens

Llanos Casanova, Gema Alonso and Francisco J. Moreno — 19 — Some aspects of metabolic adaptations in lipid metabolism during starvation are mimicked by epinephrine in rat adipocytes

Grzegorz Bartosz, Maria Gaczynska, Wanda Retelewska, Ewa Grzelinska and Janusz Rosin — 25 — Hyperthermia, unlike ionizing radiation and chemical oxidative stress, does not stimulate proteolysis in erythrocytes

Joel Abramowitz, Alphonso R. Campbell and Bhanu P. Jena — 31 — Pertussis toxin-mediated ADP-ribosylation of rabbit luteal G_i uncouples enkephalin inhibition of adenylyl cyclase

Hiromi Yamazaki, Keiko Nishiguchi, Palitha Serasinghe and Suehiro Nakanishi — 39 — Differential localization of microsomal mixed function oxidase activity in periportal and perivenous hepatocytes isolated from rat liver

Khomei Yanagi, Kunio Ohyama, Toshio Yamakawa, Kazu Hashimoto and Seiichi Ohkuma — 43 — Purification and characterization of anti-N lectin from *Vicia unijuga* leaves

W. S. D. Wong, C. Batt and J. E. Kinsella — 53 — Purification and characterization of rat liver transglutaminase

Barbara A. Myers, Michael P. Lawton, Curtis L. Ruegg, Michael L. Bruss and Charles E. Cornelius — 61 — Hepatic bilirubin and UDP-glucuronate levels in Bolivian squirrel monkeys exhibiting fasting hyperbilirubinemia

Desmond B. Johnson, Melvin M. Markowitz, Philip E. Joseph, Daniel G. Miller and Ronald W. Pero — 67 — Mitogenic induction of ornithine decarboxylase in human mononuclear leukocytes: relationships with adenosine diphosphate ribosyltransferase

Pierre Chapdelaine, My-Anh Ho-Kim, Roland R. Tremblay and Jean Y. Dubé — 75 — Southern blot analysis with synthetic oligonucleotides. Application to prostatic protein genes

Shin'ichi Shoji — 83 — Effect of exogenous cortisone on amino acid metabolism in rats

Toshinori Yamamoto, Hiromi Sugawara, Shun-Ichi Shimizu and Kazutaka Momose — 89 — Possible existence of an intermediate pool of ubiquinone in rat heart mitochondria

Pascal Grondin, Chantal Vergnolle, Louis Chavant and **Jean Claude Kader** 93 Purification and characterization of a novel phospholipid transfer protein from filamentous fungi

M. Curto, M. Piccinini, C. Marino, M. Mostert, R. Bruno and **M. T. Rinaudo** 99 Pyruvate dehydrogenase activation by insulin in human circulating lymphocytes and the possible pathway involved

David Askin, Anne K. Green, Alan J. Dickson and **Michael J. Fisher** 107 Phenylalanine hydroxylation in isolated rat kidney tubules

Vol. 22, No. 2

Minireviews

C. Tyler Burt and **Benjamin Chen** 115 Biochemical consequences of phosphorylcholines low pK with special relevance to human semen: passive pH regulation

Charles H. Beresford and **Maurice C. Owen** 121 Antithrombin III

A. A. Boldyrev 129 Retrospectives and perspectives on the biological activity of histidine-containing dipeptides

General Papers

David Keast and **Eric A. Newsholme** 133 Effect of mitogens on the maximum activities of hexokinase, lactate dehydrogenase, citrate synthase and glutaminase in rat mesenteric lymph node lymphocytes and splenocytes during the early period of culture

Delio Petrucci and **Patrizia Cesare** 137 ATP inhibition competes with activating cations in modulating the $NAD(P)^+$-malic enzyme activity in the mitochondrial matrix of *Xenopus laevis* oocytes

Yoko Arai, Iwao Koyama, Norio Hirota, Takao Sakai, Yoshikatsu Sakagishi and **Tsugikazu Komoda** 143 Developmental changes in the antigenicity and sugar-chain heterogeneity of rabbit alkaline phosphatases

Tatsuo Muramatsu, Daisuke Takai, Kazumi Kita and **Jun-ichi Okumura** 153 Studies on the measurement of whole-body protein degradation *in vivo* in the chicken

Martha Kaloyianni and **R. A. Freedland** 159 Effect of diabetes and time after *in vivo* insulin administration on ketogenesis and gluconeogenesis in isolated rat hepatocytes

M. Yashima, N. Ogura and **Y. Abiko** 165 Studies on cholesterol accumulation in radicular cyst fluid—origin of heat-stable cholesterol-binding protein

J. Rabovsky, D. J. Judy, M. Goddard, W. H. Pailes and **V. Castranova** 171 Lung cytochrome *P*450-dependent benzyloxyphenoxazone debenzylase and ethoxyphenoxazone deethylase activities in total microsomal and isolated alveolar type II cells: responses to changes in assay conditions with special reference to non-linear dependence at low enzyme concentration

M. C. Pol, H. F. Deutsch and **L. Visser** 179 Purification of soluble enzymes from erythrocyte hemolysates by three phase partitioning

Joseph W. Irvine, James H. Ottaway and **C. Linda Saunderson** 187 Turnover of sarcoplasmic proteins in the breast muscle of rapidly growing chicks

Ronit Surkis, Sara Rubinraut, Shlomo Dagan, Ester Tzehoval, Mati Fridkin, Rami Ben Yoseph and **Raphael Catane** 193 Polytuftsin: a potential precursor for slow release of the phagocytosis stimulating peptide tuftsin

Marijke Verhaeghe, Marc De Wolf, Albert Lagrou, Guido Van Dessel, Herwig Hilderson and **Wilfried Dierick** 197 Identification of essential amino acids in the active center of thyroidal NAD^+ glycohydrolase

Book Reviews 203

New Patents Section i

Vol. 22, No. 3

Minireviews

Margot P. Cleary 205 Effect of dehydroepiandrosterone treatment on liver metabolism in rats

N. Seiler and **F. Dezeure** 211 Polyamine transport in mammalian cells

Yasuo Kagawa and **Shigeo Ohta** 219 Regulation of mitochondrial ATP synthesis in mammalian cells by transcriptional control

General Papers

Roichi Itoh and **Kouichi Yamada** 231 Pig lung 5′-nucleotidase: effect of diadenosine 5′,5‴-P^1,P^4-tetraphosphate and its related compounds

H. Jaffe, J. B. O'Neill, P. L Hallberg, T. Kingan, G. Barbour, M. Lawson, L. D. Kwart, M. R. Ruff, C. B. Pert and **K. R. Rao** 239 Isolation and identification of a peptide from rat brain which inhibits [^{3}H]TCP binding

Sean M. Stevens, Christopher Bosio, Jennifer Moehring, Ellis L. Kline and **Mitchell I. Chernin** 247 The effects of anthranilic acid on gene expression

Oscar Molina, Randal K. Seriel, Marcos Martinez, Maria L. Sierra, Armando Varela-Ramirez and **Eppie D. Rael** 253 Isolation of two hemorrhagic toxins from *Crotalus basiliscus basiliscus* (Mexican west coast rattlesnake) venom and their effect on blood clotting and complement

G. Wu and **J. R. Thompson** 263 The effect of ketone bodies on protein turnover in isolated skeletal muscle from the fed and fasted chick

W. M. Wiersinga and **M. Platvoet-ter Schiphorst** 269 Inhibition of nuclear T_3 binding by fatty acids: dependence on chain length, unsaturated bonds, *cis–trans* configuration and esterification

Simon Welch and **Louise Langmead** 275 A comparison of the structure and properties of normal human transferrin and a genetic variant of human transferrin

B. Ricard, R. Roccetti, C. Tassi, M. Bernard, F. Percheron, A. Orlacchio and **M. J. Foglietti** 283 Human urinary and renal α-L-fucosidases. A comparative study

Christiane Levrat, Dominique Ardail and **Pierre Louisot** 287 Comparative study of the *N*-glycoprotein synthesis through dolichol intermediates in mitochondria, Golgi apparatus-rich fraction and endoplasmic reticulum-rich fraction

Anastasios D. Papaphilis and **Helen E. Kotsifaki** 295 Structural properties of the cAMP-dependent protein kinase associated with rat synaptic plasma membranes—I. Configuration *in situ* and membrane association-derived influences on [^{3}H]cAMP binding

Fuyuki Iwasa, Richard A. Galbraith and **Shigeru Sassa** 303 Phenotypic variation in human HepG2 hepatoma cells: alterations in cell growth, plasma protein synthesis and heme pathway enzymes

Dimiter A. Moutafchiev and Ljuben M. Sirakov 311 Lactating mouse mammary cell uptake of ^{59}Fe-transferrin. The effect of KCN, 2,4-dinitrophenol, ethanol and ATP

New Patents Section i

Vol. 22, No. 4

Minireview

Timothy O'Hare and Paul F. Pilch 315 Intrinsic kinase activity of the insulin receptor

General Papers

H. Xu, L. F. Lau and C. M. Lee 325 Synergistic effect of phorbol myristate acetate on bacterial lipopolysaccharide induced rat splenocyte proliferation

D. M. McSweeney and J. J. A. Heffron 329 Uptake and release of calcium ions by heavy sarcoplasmic reticulum fraction of normal and malignant hyperthermia-susceptible human skeletal muscle

J. Blanche O'Neill, H. Jaffe, P. L. Hallberg, J. M. Buzy, T. Kingan, G. Barbour, M. Lawson, L. D. Kwart, M. R. Ruff, C. B. Pert and K. R. Rao 335 Identification of a domain in cytochrome *C* that displaces [^{3}H]TCP binding from rat brain membrane receptors: synthesis of β-neuroprotectin

J. Ruf and F. J. Gella 341 Role of calcium and cyclic AMP on the activation of lymphocyte glycogen phosphorylase by mitogens

Cindy E. McKinney and Ibrahim Z. Ades 347 Production of δ-aminolevulinate: subcellular localization and purification of murine hepatic L-alanine: 4,5-dioxovaleric acid aminotransferase

Donald O. Mack, Victoria L. Reed and Larry D. Smith 359 Retinyl acetate inhibition of 3′-methyl-4-dimethyl-amino-azobenzene induced hepatic neoplasia

Harold T. Spencer, Matthew J. Pete and Donald R. Babin 367 Structural studies on porcine hemopexin

Theodore Page and James D. Connor 379 The metabolism of ribavirin in erythrocytes and nucleated cells

P. Ciancaglini, J. M. Pizauro, A. A. Rezende, L. A. Rezende and F. A. Leone 385 Solubilization of membrane-bound matrix-induced alkaline phosphatase with polyoxyethylene 9-lauryl ether (polidocanol): purification and metalloenzyme properties

Rene J. A. Paulussen, Herman T. B. van Moerkerk and Jacques H. Veerkamp 393 Immunochemical quantitation of fatty acid-binding proteins. Tissue distribution of liver and heart FABP types in human and porcine tissues

Hui Hong, Saleh C. El-Saleh and Peter Johnson 399 Fluorescence spectroscopic analysis of calpain II interactions with calcium and calmodulin antagonists

Eikichi Hashimoto and Hirohei Yamamura 405 Comparison of substrate recognition by protein kinase C (type III) between rat liver cytosolic and particulate fractions

T. Gauthier, C. Denis-Pouxviel and J. C. Murat 411 Respiration of mitochondria isolated from differentiated and undifferentiated HT29 colon cancer cells in the presence of various substrates and ADP generating systems

T. Gauthier, C. Denis-Pouxviel and J. C. Murat 419 Mitochondrial hexokinase from differentiated and undifferentiated HT29 colon cancer cells: effect of some metabolites on the bound/soluble equilibrium

Book Reviews 425

New Patents Section i

Contents

Vol. 22, No. 5

Minireview

Kenneth T. Douglas, Marlene A. Bunni and Swati R. Baindur — 429 Thallium in biochemistry

General Papers

Nataliya A. Dc..isova — 439 Phospholipid composition of myelin and synaptosomal proteolipid from vertebrate brain

Jorge Beleta, Pilar Benedicto, Pere Aymerich and F. Javier Gella — 443 Purification and characterization of native and proteolytic forms of rabbit liver phosphorylase kinase

Jorge Beleta, Pilar Benedicto and F. Javier Gella — 453 Regulatory properties of rabbit liver phosphorylase kinase

Eric C. Dietze, Jacques Magdalou and Bruce D. Hammock — 461 Human and murine cytosolic epoxide hydrolase: physical and structural properties

Edward F. Skorkowski and Kenneth B. Storey — 471 Regulation of coenzyme utilization by mitochondrial NAD(P)-dependent malic enzyme

Hiromi Sugawara, Toshinori Yamamoto, Shun-Ichi Shimizu and Kazutaka Momose — 477 Inhibition of ubiquinone synthesis in isolated rat heart under an ischemic condition

Nget-Hong Tan and M. Nomanbhay Saifuddin — 481 Purification and characterization of two acidic phospholipase A_2 enzymes from king cobra (*Ophiophagus hannah*) snake venom

S. Colombatto, L. Fasulo, B. Fulgosi and M. A. Grillo — 489 Transport and metabolism of polyamines in human lymphocytes

Mustapha Dadssi and Alain J. Cozzone — 493 Occurrence of protein phosphorylation in various bacterial species

Cyril Dickson and Arnold Stern — 501 Tetravalent vanadium mediated oxidation of low density lipoprotein

Jiann-Wu Wei and Wen-Chun Hung — 507 Guanine nucleotides have a direct inhibitory effect on polyphosphoinositide turnover in rat cortical synaptosomes

Jiong Wu, Jiang-Qin Zhu, De-Xu Zhu, Andrée Scharfmann, Geneviève Lamblin, Arnold Boersma and Kia-Ki Han — 513 The regulatory effects of macrophages on colony stimulating factor-1 (CSF-1) production

Alfons C. J. de Vries and Ben Colenbrander — 519 Isolation and characterization of boar spermatozoa with and without a cytoplasmic droplet

Françoise Ciroussel, Marie-Jeanne Vacheron, Micheline Guinand and Georges Michel — 525 Purification and properties of an LD-dipeptidase from *Bacillus sphaericus*

K. Pavelić, V. Baltić and Š. Spaventi — 533 Artificial reversion of acute myeloid leukemia cells into normal phenotype

Hassan Eloumami, Dominique Bladier, Danièle Caruelle, José Courty, Raymonde Joubert and Michel Caron — 539 Soluble heparin-binding lectins from human brain: purification, specificity and relationship to an heparin-binding growth factor

Sanae Shimamura, Hiroshige Hibasami, Uichiro Kano, Shozo Watanabe, Shiro Suzuki and Kunio Nakashima 545 Modulation by polyamines of DNA-dependent DNA polymerase activity from human serum

Book Reviews 551

New Patents Section i

Vol. 22, No. 6

Minireviews

Rivka Beitner 553 Regulation of carbohydrate metabolism by glucose 1,6-bisphosphate in extrahepatic tissues; comparison with fructose 2,6-bisphosphate

Jerold A. Last, Lucas G. Armstrong and Karen M. Reiser 559 Biosynthesis of collagen crosslinks

Ibrahim Z. Ades 565 Heme production in animal tissues: the regulation of biogenesis of δ-aminolevulinate synthase

J. F. Savouret, M. Misrahi and E. Milgrom 579 Molecular action of progesterone

General Papers

Andrés Carmona and R. A. Freedland 595 Effect of 6-aminonicotinamide on pentose cycle activity in isolated hepatocytes

A. Papadopoulos, B. Michaelidis and A. Lazou 601 Tissue specific isoenzymes of D-lactate dehydrogenase from the foot, mantle and hepatopancreas of *Patella caerulea* (L). Purification and properties

Paul D. Drew and Ibrahim Z. Ades 607 Induction of cytochrome *P*-450 RNA by porphyrogenic agents: on the nature of the coordinate induction with δ-aminolevulinate synthase in tissues of the chicken embryo

Carlos Curti, Sérgio A. Uyemura, Maria J. Grecchi and Francisco A. Leone 611 Kinetic properties of mitochondrial ATPase during isoproterenol-induced cardiomyopathy

Anna Szczęsna-Kaczmarek 617 L-Lactate oxidation by skeletal muscle mitochondria

G. Lazar, M. Pagano and M. K. Agarwal 621 Purification and characterization of the activated mineralocorticoid receptor from rat kidney

George Loo, Elliott Berlin and John T. Smith 631 Inhibition of mitochondrial palmitate oxidation by calmodulin antagonists

Momoyo Asahi, Takanobu Taniguchi, Keiko Sakai, Shun-ichi Nakamura and Hirohei Yamamura 635 Diverse effects of poly-basic amino acids, heparin and ionic strength on the phosphorylation of various substrates by cytosolic protein–tyrosine kinase from porcine spleen

Rolf A. Løvstad 641 Interaction of iron–bleomycin with catecholamines

Javier Garcia-Alonso, Angel Reglero and Jose A. Cabezas 645 Purification and properties of β-*N*-acetylhexosaminidase A from pig brain

Katsuhiro Otsuka, Seiichi Ohkuma and Takashi Nakajima 653 Isolation and partial characterization of two glycoproteins from human liver metastases of sigmoid colon carcinoma

Khomei Yanagi, Kunio Ohyama, Toshio Yamakawa, Hajime Watanabe, Shun Hirakawa and Seiichi Ohkuma 659 Biochemical characterization of glycoprotein components in human ovarian cyst fluids by lectins

Marianne Andersson, Stina M. Oredsson, Henrik Olsson and Håkan Bergstrand 665 Diadenosine tetraphosphate (Ap_4A) levels in HL-60 cells during differentiation into granulocytes and monocytes

Shoou-Lih Wang, Chi Ying Wu-Wang, Amalia Slomiany and Bronislaw L. Slomiany 669 Characterization of epidermal growth factor receptor in rat buccal mucosal cells

Book Reviews 677

New Patents Section i

Vol. 22, No. 7

Minireviews

Miguel A. Medina and Ignacio Núñez de Castro 681 Glutaminolysis and glycolysis interactions in proliferant cells

N. C. P. Cross and T. M. Cox 685 Hereditary fructose intolerance

Mahmoud Ghomi, Richard Letellier, Jean Liquier and Eliane Taillandier 691 Interpretation of DNA vibrational spectra by normal coordinate analysis

Graeme Milligan, Fergus R. McKenzie, Steven J. McClue, Fiona M. Mitchell and Ian Mullaney 701 Guanine nucleotide binding proteins in neuroblastoma × glioma hybrid, NG108-15, cells. Regulation of expression and function

General Papers

I. Durieux, M. B. Martel and R. Got 709 Effect of phospholipids on UDP-glucose:ceramide glucosyltransferase from Golgi membranes

Shiaw-Der Yang 717 Selective activation of the two catalytic sites in the ATP·Mg-dependent phosphoprotein phosphatase by kinase Fa and Mn^{2+} ion

James W. Bailey and Murray L. Kaplan 721 The effect of triiodothyronine on glucose utilization in adipocytes from obese rats

Julia de la Cruz, Isabel Burón and Isabel Roncero 729 Morphological and functional studies during aging at mitochondrial level. Action of drugs

Sandra Coderoni, Mario Paparelli and Gian Luigi Gianfranceschi 737 Phosphorylation sites for type N II protein kinase in DNA–topoisomerase I from calf thymus

Pietro Ciancaglini, João M. Pizauro, Carlos Curti, Antonio C. Tedesco and Francisco A. Leone 747 Effect of membrane moiety and magnesium ions on the inhibition of matrix-induced alkaline phosphatase by zinc ions

Bjørn Brodal and Kirsten Hjelle 753 Synthesis of phosphoenolphosphate from pyruvate in rat skeletal muscle

Basile Michaelidis and Kenneth B. Storey 759 Phosphofructokinase from the anterior byssus retractor muscle of *Mytilus edulis*: modification of the enzyme in anoxia and by endogenous protein kinases

Yumiko Komori and Hisayoshi Sugihara 767 Characterization of a new inhibitor for angiotensin converting enzyme from the venom of *Vipera aspis aspis*

M. Förster and W. Staib 773 Further evidence for direct interaction of pyruvate dehydrogenase multienzyme complex with citric acid cycle based on nonlinearity of Hill plots in presence of C_2 and C_4 substrate analogues

José A. Teruel, José Villalaín and **Juan C. Gómez-Fernández**	779	Effect of protease digestion on the secondary structure of sarcoplasmic reticulum Ca^{2+}-ATPase as seen by FT-i.r. spectroscopy
I. C. Bonini de Romanelli, M. I. Aveldaño and **F. J. Barrantes**	785	Asymmetric distribution of phospholipids in acetylcholine receptor-rich membranes from *T. marmorata* electric organ
Book Reviews	791	

Vol. 22, No. 8

Minireviews

Tatsuo Muramatsu	793	Gut microflora and tissue protein turnover *in vivo* in animals
Michael J. Saxton	801	The membrane skeleton of erythrocytes: models of its effect on lateral diffusion
Peter Johnson	811	Calpains (intracellular calcium-activated cysteine proteinases): structure–activity relationships and involvement in normal and abnormal cellular metabolism
Carole Heath and **Georges Belfort**	823	Membranes and bioreactors

General Papers

Toshio Obata and **Yasumitsu Yamanaka**	837	Comparative studies on semicarbazide-sensitive amine oxidase in heart and plasma of rats treated with hepatotoxin allyl formate
Erin M. O'Donoghue, Juan A. Cooper, Timothy G. Jackson, Peter R. Shepherd, Paul D. Buckley and **Leonard F. Blackwell**	841	Identification of peptides from autolysates of *Saccharomyces cerevisiae* that exhibit glucose tolerance factor activity in a yeast assay
Philip C. Calder and **Robert Geddes**	847	Post mortem glycogenolysis is a combination of phosphorolysis and hydrolysis
Gilla Lilling and **Rivka Beitner**	857	Decrease in cytoskeleton-bound phosphofructokinase in muscle induced by high intracellular calcium, serotonin and phospholipase A_2 *in vivo*
Eikichi Hashimoto, Yukie Tanaka and **Hirohei Yamamura**	865	Mechanism of proteolytic activation of rat liver protein kinase C generating Ca^{2+}-phospholipid-independent form with apparent molecular mass of 80,000
Christine Morand, Catherine Redon, Christian Remesy and **Christian Demigne**	873	Non-hormonal and hormonal control of glycogen metabolism in isolated sheep liver cells
Hideo Mizunuma and **Yohtalou Tashima**	883	Survey of fructose 1,6-bisphosphatase isoenzyme in rat organs and ontogenic expression of the enzyme in rat fetus
Pascal Reboul, Pierre Broquet, Pascal George and **Pierre Louisot**	889	Effect of retinoic acid on two glycosyltransferase activities in C6 cultured glioma cells
Makoto Fujii, Kiyomi Fukukura, Kimihiro Kisanuki, Hideyuki Yamaoka and **Katsuya Koga**	895	Acid triacylglycerol lipase inhibitor in chicken plasma: purification and properties
Rolf A. Løvstad	899	Stimulatory effect of AMP on the copper ion dependent oxidation of adrenaline to adrenochrome

L. P. W. J. van den Heuvel, J. van den Born, J. H. Veerkamp, G. H. G. W. Janssen, T. J. A. M. van de Velden, L. A. H. Monnens, C. H. Schröder and **J. H. M. Berden** 903 Comparison of heparan sulfate proteoglycans from equine and human glomerular basement membranes

Chi Ying Wu-Wang, Shoou-Lih Wang, Amalia Slomiany and **Bronislaw L. Slomiany** 915 Characterization of gastric mucosal prostaglandin E_2 receptor

Suh Yoo-Hun, Il-Sun Park, Hun-Sik Kim, Sung-Oh Huh, Sung-Soo Kim, Yang-Sook Chun, Woong Choi and **Chan Woong Park** 921 Cloning and analysis of the pseudogene for human epinephrine synthesizing enzyme, phenylethanolamine *N*-methyltransferase (PNMT)

New Patents Section i

Vol. 22, No. 9

Minireviews

Lars Ødum 925 Inter-α-trypsin inhibitor: a plasma proteinase inhibitor with a unique chemical structure

Josep M. Argilés and **Francisco J. López-Soriano** 931 Intestinal amino acid transport: an overview

S. Barker and **G. P. Vinson** 939 Epidermal growth factor in breast cancer

Karl-Heinz Altmann and **Manfred Mutter** 947 A general strategy for the *de novo* design of proteins—template assembled synthetic proteins

General Papers

William S. Utley and **Harihara M. Mehendale** 957 Phenobarbital-induced cytoprotective mechanisms in menadione metabolism: the role of glutathione reductase and DT-diaphorase

Zofia Kilianska, Paul Ditulio and **Jen-Fu Chiu** 969 Hepatoma-associated non-histone proteins are phosphoproteins preferentially localized in nuclear matrix

Sakda T. Trisak, Prayong Doumgdee and **Bernd M. Rode** 977 Binding of zinc and cadmium to human serum albumin

P. Flawn and **E. G. Loten** 983 Properties and distribution of cyclic AMP phosphodiesterase from rat liver

Gillian C. Macadam, Judith S. Bond and **Robert J. Beynon** 989 A cryptic meprin-like proteolytic activity in mouse kidney brush border membranes

Susan J. Sulakhe, Sam T. Tran and **Vivian B. Pulga** 997 Modulation of γ-glutamyltranspeptidase activity in rat liver plasma membranes by thyroid hormone

Nora M. Navone, César F. Polo, Rodolfo M. Dinger and **Alcira M. del C. Batlle** 1005 Heme regulation in mouse mammary carcinoma and liver of tumor bearing mice—I. Effect of allyl-isopropylacetamide and veronal on δ-aminolevulinate synthetase, cytochrome *P*-450 and cytochrome oxidase

T. T. Markovska, T. N. Neicheva, A. B. Momchilova-Pankova, K. S. Koumanov and **R. Infante** 1009 Effect of probucol on the lipid composition of blood plasma, erythrocyte ghosts and liver membranes in mice

Khomei Yanagi, Kunio Ohyama, Toshio Yamakawa and **Seiichi Ohkuma** 1015 Isolation and characterization of blood group N antigen precursor glycoproteins with Thomsen–Friedenreich (T) activity, N antigen precursor glycoproteins and T-active glycoproteins from cyst fluids of malignant ovarian clear cell carcinoma

Tülin Güray and **Emel Arınç**	1029	Purification of NADH–cytochrome b_5 reductase from sheep lung and its electrophoretic, spectral and some other properties
Muriel Bortolato, Gérard Azzar, Jean Farjanel and **René Got**	1039	Evidence of partial localization in Golgi apparatus of UDP–glucose collagen glucosyltransferase from chick embryo liver
Claudia Tomes and **Silvia Moreno**	1047	cAMP analogs and selective inhibitors used to study low K_m *Mucor rouxii* cAMP phosphodiesterase
Yumiko Komori, Toshiaki Nikai and **Hisayoshi Sugihara**	1053	Isolation and characterization of factor X activator from the venom of *Vipera aspis aspis*

Paul S. Foster 1217 Malignant hyperpyrexia

John J. Heikkila 1223 Expression of cloned genes and translation of messenger RNA in microinjected *Xenopus* oocytes

Ashok K. Srivastava 1229 Non-receptor protein tyrosine kinases of normal tissues

Godfrey Tunnicliff 1235 Action of inhibitors on brain glutamate decarboxylase

General Papers

Calvin D. Tormanen 1243 Comparison of the properties of purified mitochondrial and cytosolic rat kidney transamidinase

Danuta M. Rzymkiewicz 1251 Changes in thermodependence of the tyrosine transaminating activity in mitochondria of *Drosophila melanogaster* larvae due to environmental stress

Gu-Gang Chang, Jue-Cheng Li, Jin-Der Chen, Ching-Liang Meng and **Tzu Lin** 1259 Inhibition of human cancer cell growth by periodate-oxidized 3-aminopyridine adenine dinucleotide phosphate

Masaru Kubota, Sigemi Kitahara, Kouji Narita, Akira Tamura, Keiji Sano, Hiroyuki Shimasaki and **Nobou Ueta** 1269 Changes in cerebral free fatty acids and triacylglycerols in focal cerebral ischemia

Anna Boukla	1273	Purification and properties of bovine nasal hyaline cartilage collagenase
Vicente Madrid-Marina	1283	Soluble "high K_m" 5′-nucleotidase activity in human T- and B-lymphoblasts: isolation and some properties
Shigenobu Umeki	1291	Ampicillin serves as an electron donor
Asok K. Sen	1295	Application of electrical analogs to metabolic control analysis: linear pathways with multiple feedback
Ryuhei Funabiki, Kazumi Yagasaki, Chizu Shirakawa, Hideo Sugita and **Shoichi Ishiura**	1303	Activity measurement of lysosomal cysteine proteinases, cathepsins B, H and L, in crude tissue extracts, and their relation to the fractional rate of protein degradation
Alain Fréminet, Pierre Mégas and **Michel Pucéat**	1307	Depressed gluconeogenesis and ureogenesis in isolated hepatocytes after intermittent hypoxia in rats
Shigemi Hayashi, Kunio Ohyama, Khomei Yanagi, Toshio Yamakawa, Hajime Watanabe, Shun Hirakawa and **Seiichi Ohkuma**	1315	Separation and biochemical characterization of blood group N antigen precursor glycoproteins with Thomsen–Friedenreich (T) activity, T-active glycoproteins and N antigen precursor glycoproteins from ascites of primary ovarian cancer patients
Satoshi Unakami, Tsugikazu Komoda and **Yoshikatsu Sakagishi**	1325	Translocation of intestinal alkaline phosphatase in streptozotocin-induced diabetic rats
Yoshimi Takata and **Motoji Fujioka**	1333	Recombinant rat guanidinoacetate methyltransferase: study of the structure by trace labeling lysine residues with acetic anhydride
Maria G. Castro, Barbara A. Spruce, Demetris Savva and **Phillip J. Lowry**	1341	Expression of biologically active human pre-procorticotropin releasing hormone in *E. coli:* characterization and purification
Jan Pałyga	1351	Variability of histone H1 in rabbit populations
Book Reviews	1363	

Vol. 22, No. 12

Minireviews

J. F. Lamb	1365	Regulation of the abundance of sodium pumps in isolated animal cells
Jakob Korf and **Jaep de Boer**	1371	Lactography as an approach to monitor glucose metabolism on-line in brain and muscle
Michel Caron, Dominique Bladier and Raymonde Joubert	1379	Soluble galactoside-binding vertebrate lectins: a protein family with common properties

General Papers

H. R. Arias and **F. J. Barrantes**	1387	Phosphoinositides and inositol phosphates in *Discopyge tschudii* electrocyte membranes
Han J. Moshage, Hans M. G. Princen, Jos van Pelt, Hennie M. J. Roelofs, Willem Nieuwenhuizen and **Sing Hiem Yap**	1393	Differential effects of endotoxin and fibrinogen degradation products (FDPs) on liver synthesis of fibrinogen and albumin: evidence for the involvement of a novel monokine in the stimulation of fibrinogen synthesis induced by FDPs
Francois J. Joubert, Nico Taljaard and **Richard C. Clark**	1401	Sulphhydryl protease inhibitors from pineapple plant stem

Nora M. Navone, César F. Polo, Alberto L. Frisardi, Nélida E. Andrade and Alcira M. del C. Batlle	1407	Heme biosynthesis in human breast cancer—mimetic "*in vitro*" studies and some heme enzymic activity levels
Derk Hardeman, Hanneke W. M. Zomer, Ruud B. H. Schutgens, Joseph M. Tager and Henk van den Bosch	1413	Effect of peroxisome proliferation on ether phospholipid biosynthesizing enzymes in rat liver
J. E. Domínguez, R. Padilla, J. Avila and J. L. Carrascosa	1419	Removal of the carboxyl terminus of β-tubulin subunit produces lateral annealing of microtubules with different orientations
Hidenari Shigematsu, Yukiko Hisanari and Yasuo Kishimoto	1427	α-Hydroxylation of lignoceroyl–CoA in rat brain microsomes: involvement of NADPH–cytochrome *c* reductase and topical distribution
Orhan Adalı and Emel Arınç	1433	Electrophoretic, spectral, catalytic and immunochemical properties of highly purified cytochrome *P*-450 from sheep lung
Hideaki Itoh, Ryoji Kobayashi and Yohtalou Tashima	1445	Isolation and some properties of bovine brain 100 kDa heat shock protein
Kamen S. Koumanov, Albena B. Momchilova-Pankova, Shu-ren Wang and Recaredo Infante	1453	Membrane phospholipid composition, fluidity and phospholipase A_2 activity of human hepatoma cell line $HepG_2$
Fang Qian, Allen Frankfater, Robert V. Miller, Shu Jin Chan and Donald F. Steiner	1457	Molecular cloning of rat precursor cathepsin H and the expression of five lysosomal cathepsins in normal tissues and in a rat carcinosarcoma
Gerald R. Buzzell, Andreas Pangerl, Brigitte Pangerl, Armando Menendez-Pelaez, Mary K. Vaughan, John C. Little, Steven M. Hill, George M. Vaughan and Russel J. Reiter	1465	Melatonin and porphyrin in the Harderian glands of the Syrian hamster: circadian patterns and response to autumnal conditions
B. Atanassov, S. Kyurkchiev, G. Georgiev and I. Kehayov	1473	Characterization of NAD(P)H diaphorase from boar spermatozoa using specific monoclonal antibodies
P. Boivin, C. Galand and D. Dhermy	1479	*In vitro* digestion of spectrin, protein 4.1 and ankyrin by erythrocyte calcium dependent neutral protease (calpain I)
Robert M. McGrath and Ann Smith	1496	The isolation of large molecular mass procyanidins from grain sorghum and their interaction with [^{14}C]methyl bovine serum albumins
Adelina Prado, Milton M. S. da Costa and Vitor M. C. Madeira	1497	Liposomes from the thermophilic eubacterium *Thermus* sp. fluorescence polarization and permeability properties
